

Knowledge grows

UltrANTM
Your reliable AN partner

Yara has been supplying the Mining and Explosives market for nearly a century. With this comes experience and understanding of the evolving needs of the Industry. Yara invests in, and further develops, its range of UltrAN Technical Nitrates products (Ammonium Nitrate and Calcium Nitrate), applications, and production plants that make them.

This ensures we have :

- Tight control of the supply chain, from integrity of product, preserved through selected packaging material, storage discipline and strict stock rotation, which extends the shelf life of Yara products, resulting in consistent ANFO, emulsion and explosives production
- Multiple manufacturing facilities meeting global demand, ensuring reliability of supply to current and new markets
- On-time distribution to over 75 countries, in 6 different continents
- Dedicated HESQ team for assistance and advice on safe handling and storage of UltrAN products
- Yara in-house design of customized production plants for civil explosive makers, both for ANFO and emulsion
- Global presence with local Representatives and in-house Technical Experts
- Continually improved and extended portfolio of differentiated grades and products

Our continued investment means your blasting is more efficient, cost-and-time effective, and safer with UltrAN Technical Nitrate products and services.
